Call for Papers: Digital Headache

Cephalalgia is the official journal of the International Headache Society, a leading international scientific society dedicated to advancing the understanding and treatment of headache disorders.

Introduction

The development of new digital technologies and their increasing use is impacting headache and migraine care and research. This special issue of Cephalalgia will explore the emerging field of "Digital Headache," encompassing the various ways in which advancements in technology and digital device use may contribute or impact the headache field.

Scope

We invite submissions on a wide range of topics related to Digital Headache, including but not limited to artificial intelligence, chatbots, telemedicine, digital education, digital technology in research, impact of digital devices on headache, public health impact of digital technology.

Submission Guidelines

- All submissions must adhere to the general submission guidelines of Cephalalgia.
- Manuscripts should be submitted electronically through the journal's online submission system.
- Please clearly indicate in the cover letter that the manuscript is intended for the "Digital Headache" special issue.

Deadline for Submissions: December 31, 2025

Disclaimer: This Call for Papers is for informational purposes only. The final decision on manuscript acceptance rests with the Editor-in-Chief of Cephalalgia.
